

31. Saxon Investors Roadshow

March 11, 2026 | 1 PM – 5 PM | Online

Program

- 1:00 PM** **Check-in**
- 1:10 PM** **Welcome: introduction to the platform and event**
- 1:30 PM** **Pitch session I: Enterprise Software & Applied AI**

(1) Company

Short description	Company 1 is a serverless AI platform built for developers, removing the primary barriers to AI adoption - infrastructure complexity and cost - by offering a platform where users select an open-source model and instantly get a scalable, production-ready API.
Achieved milestone	MVP
Funding round	Seed, 500.000 €

(2) Company

Short description	Company 2 is the NIS2-Native Compliance OS for the European Digital Decade, empowering critical industries to effortlessly master mandatory NIS2 and CRA regulations by automating complex compliance processes.
Achieved milestone	MVP
Funding round	Pre Seed, 230.000 €

(3) Company

Short description	Company 3 is an AI-first, voice-driven SaaS platform for service businesses that turns natural speech into correctly executed tasks, projects, time tracking and financial actions.
Achieved milestone	MVP
Funding round	Pre Seed, 750.000 €

(4) Company

Short description	Company 4 is a web application for collaborative decision-making in teams. It offers an asynchronous, structured and guided decision-making process, improving the organization's decision speed and quality.
Achieved milestone	MVP
Funding round	Pre Seed, 200.000 €

(5) Company

Short description	Company 5 is a mixed-reality platform for hybrid workshops that integrates remote participants into the physical room as avatars. It enables equal interaction, shared 3D collaboration, and true co-presence across locations.
Achieved milestone	PoC
Funding round	Seed, 400.000 €

(6) Company

Short description	Company 6 is a communication-focused language tool developed with Europe's leading language schools, utilizing a unique phonetic AI model to provide true pronunciation feedback across 52 languages.
Achieved milestone	PoC
Funding round	Pre Seed, 800.000 €

2:10 PM **Networking**

2:40 PM **Pitch session II: BioTech & Life Science**

(7) Company

Short description	Company 7 is an AI-powered learning platform for medical students for their oral exam preparation. Users answer exam-relevant questions orally and receive immediate, individualized feedback on content and expression.
Achieved milestone	Market Traction
Funding round	Seed, 600.000 €

(8) Company

Short description	Company 8 develops the "CoScientist", an autonomous AI platform that turns complex AI workflows into transparent, explainable, and fast R&D processes, enabling SMEs to design better proteins in days instead of months.
Achieved milestone	MVP
Funding round	Pre Seed, 800.000 €

(9) Company

Short description	Company 9 develops a SAW-based biosensor platform for patient-near diagnostics, enabling fast, quantitative biomarker measurements directly at the point of care, reducing dependence on laboratory workflows.
Achieved milestone	PoC
Funding round	Pre Seed, 1.000.000 €

(10) Company

Short description	Company 10 develops leading enzymes for polyester degradation. Using patented screening platforms and artificial intelligence, the enzymes are optimized to convert previously non-recyclable plastics into food-grade materials.
Achieved milestone	PoC
Funding round	Seed, 1.500.000 €

3:05 PM **Networking**

3:30 PM **Pitch session III: Advanced Manufacturing**

(11) Company

Short description	Company 11 has developed a process that separates previously inseparable material mixtures from textile waste into pure fractions - making recycling possible and enabling companies to save raw materials and costs.
Achieved milestone	Market Traction
Funding round	Pre Seed, 400.000 €

(12) Company

Short description	Company 12 enables tamper-proof identification and authentication of industrial components. The software turns standard laser markings into secure, unique signatures that cannot be replicated.
Achieved milestone	MVP
Funding round	Pre Seed, 750.000 €

(13) Company

Short description	Company 13 is a Deep-Tech Software Startup in IoT, building a distributed operation system for edge systems. It offers software which can support devices to act autonomously in a swarm and reduce cost by 10x.
Achieved milestone	Market Traction
Funding round	Series A, 3.000.000 €

(14) Company

Short description	Company 14 is solving the mobility challenges satellite operators face in orbit. The company delivers satellite propulsion systems on an industrial scale to ensure European sovereignty in space.
Achieved milestone	Market Traction
Funding round	Series A, 2.300.000 €

(15) Company

Short description	Company 15 develops advanced test chips and test wafers that enable precise validation of ALD, CVD and PVD processes in 3D semiconductor manufacturing.
Achieved milestone	Market Traction
Funding round	Series-A, 5.000.000 €

4:00 PM **Voting for the “Pitch of the Day” award and networking**

4:30 PM **Moderated breakout sessions**

Choose one of the sessions to deep dive into your selected topic & discuss your perspective with other investors and start-ups:
Enterprise Software & Applied AI | BioTech & Life Science | Advanced Manufacturing

5:00 PM **Outlook & Closing**
